Portfolio: <https://www.carpecodem.com/projects>

Summary

I am a full-stack web developer with skills in Javascript, React, and Node.js. I have 1 year of experience in front and back end development, which allowed me to develop my skills with creating a great initial user experience, intuitive navigation and file organization within applications, and database creation and management skills. I also have a strong background and interest in educational technology with an emphasis on accessibility.

Skills

Front End: JavaScript, React, jQuery, Node.js, HTML5, CSS3, Git, GitHub, NPM, RESTful APIs

Back End: PostgreSQL, Jasmine, webpack, ES6

Related: Written & verbal communication, data management, curriculum design and team training

Recent Projects

[Blocipedia](#) | [GitHub](#): An app for creating and sharing wikis. Built with Node.js, Express, and PostgreSQL.

[Bloccit](#) | [GitHub](#): A Node app for creating discussion communities around topics of interest. Uses Passport.js for authentication.

[BlocJams](#) | [GitHub](#): An in-browser music player designed for display on various screen sizes. Built using HTML, CSS, and React.

[Chat Room](#) | [GitHub](#): A real-time chat room app with user authentication through Firebase. Built using HTML, CSS, React.

Experience

NYOS Charter School

Austin, TX

Literacy Specialist/Special Education Teacher

January 2016 – Present

- Designed and implemented departmentally standardized tracking procedures and data management for special education students across middle and high school grades
- Lead meetings with parents and administrators to create plans for students in the special education program
- Record and manage data related to quarterly progress goal objectives for students receiving special education services
- Worked one on one with students identified as struggling readers and writers in order to bridge gaps in literacy

Education

BLOC - Intensive Bootcamp

October 2019

Full-Stack Web Development Program

- Learned industry best practices and practical software development standards with a focus on HTML5, CSS3, JavaScript, Node.js, React, and algorithms & data structures
- Created and deployed mobile-first applications while learning new languages and frameworks by collaborating weekly with a web development mentor as well as technical coaches
